**MANAGEMENT DISCUSSION AND ANALYSIS**

**Industry structure and developments**

The Indian economy has made a remarkable turnaround in the year 2015 - 16. India's economy is seen as the fastest growing economy amongst the world's major economies, with GDP growth rate at 7.6% this was the highest in five years. India's near-term growth outlook has improved with higher political certainty, improved business confidence, reduced external vulnerabilities. A number of market reforms have been instituted by Indian government and there has been significant amount of foreign direct investment made in India. Capital markets of India are doing pretty well too. All these factors have contributed to growth of Indian economy. The Indian auto-components industry has experienced healthy growth over the last few years. Some of the factors attributable to this include: a buoyant end-user market, improved consumer sentiment and return of adequate liquidity in the financial system. The auto components industry accounts for almost seven percent of India's gross Domestic Product (GDP) and employs as many as 19 million people, both directly and indirectly. A stable government framework, increased purchasing power, large domestic market and an ever increasing development in infrastructure have made India a favourable destination for investments. The automotive industry in India is one of the largest automotive markets in the world. The automobile industry accounts for 22 per cent of the country's manufacturing gross domestic product (GDP). It plays a pivotal role in country's growth. Almost all the global auto manufacturers have set up their facilities in India. In today's competitive environment, auto component manufacturers are under pressure to adopt to global standards to ensure maintaining on-time delivery and World-class quality.

The Automobile Industry in India is an emerging sector. The Industry has been continually evolving and absorbing new technologies in order to align itself with global developments. Your Company operates in Casted Components, Assemblies and Sub-assemblies segment of the Auto Components Industry. It manufactures a range of Casted components and assemblies for the Automobile Industry and is a Tier One auto components supplier.

**Opportunities and Threats**

**Opportunities-**

Automobile industry is an evolving industry. It represents freedom and economic growth. Nearly every automobile trip ends with either an economic transaction or some other benefit to the quality of life.

The Indian auto industry is witnessing a phase of rapid transformation and growth and is gearing up to compliment the vehicle industry's growth. Auto industry has been recording tremendous growth over the years and has emerged as a major contributor to India's gross domestic product (GDP).

The external environment analysis is also useful to find new opportunities for both profit and growth especially within the automobile industry this is curial to gain a competitive advantage.

**Threats-**

Presence of such a large number of players in the Automobile industry results into extensive competition, every company eating into others share leaving little scope for new players. Moreover, in the automobile industry, vehicles cannot be kept in the store for long unlike consumer durables, as automobiles lose value with time. The model gets old and the customer would not be willing to pay for it.

Macroeconomic uncertainty, Recession, unemployment etc are the economic factors which will daunt the automobile industry for a long period of time.

Rapidly changing technology, raw material costs and labour productivity, are areas of concern for the Company. Technical up-gradation would be essential for the Company in meeting the expectations of the customers in future.

Global auto companies are closely watching the Indian market, to exploit the future demand potential, and to use India as a global sourcing hub. While market potential and opportunities remain vast, the industry will be posed with important challenges and bottlenecks that need to be mitigated in the most cost effective and efficient manner, to attain common objectives.

Other threats in Automobile industry are volatility in the fuel prices, High fixed cost and investments in research and development.

**Segment - wise or product - wise performance**

The company is engaged in automobile Components manufacturing only and there are no separate reportable segments.

**Outlook**

The domestic market for four wheelers is projected to grow at a compounded annual growth rate of 9% during the next few years. The Automobile sector in India has been able to maintain its position as the 5th largest two wheelers producing nation in the world. This will provide reasonably good growth opportunities in terms of volume to component manufacturers such as our company with facilities having latest technologies and mass manufacturing facilities.

The components industry is working towards achieving world class standards of inventory management, processing time and quality levels. Over the past few decades, it has made significant progress in the export markets, indicating growing significance of the Indian industry in the global automotive value chain.

The long term outlook for the automobile industry is bright and robust, though outlook for the Indian auto industry in near term is expected to remain stable growth.

**Risks and concerns**

Intensity of competition has increased in almost all the segments of the Indian automotive market. The competition makes it difficult for companies to pass on increases in raw material prices to the customer. Due to high operating leverage, a small increase in input prices adversely affects margins by a significant percentage.

Compliance to stringent fuel emission standards and fuel efficiency requirements resulted in significant structural costs for companies as well.

The Company is aware of the increasing competition and is taking measures to remain competitive in the market place. Instead of it there is no other apparent, significant and material risk involved in this company.

**Internal control systems and their adequacy**

The company has adequate internal control procedures in commensuration with its size and nature of business at all desired levels.

**Discussion on financial performance with respect to operational performance**

Share Capital and reserve and surplus – The total paid up share capital during the year was Rs.1510 lacs consisting of 151 lacs shares of Rs. 10 each. During the year the company has earned a profit of Rs. 223.41 lacs as compared to Profit of Rs. 111.91 Lacs in previous year.

**Annexure - B to the Auditors' Report**

**Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")**

We have audited the internal financial controls over financial reporting of PORWAL AUTO COMPONENTS LIMITED ("the Company") as of 31 March 2016 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

**Management's Responsibility for Internal Financial Controls**

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

**Auditors' Responsibility**

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

**Meaning of Internal Financial Controls over Financial Reporting**

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

**Inherent Limitations of Internal Financial Controls Over Financial Reporting**

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

**Opinion**

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2016, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
